

Updates from the Network Edge

Steve Miller-Jones, VP Edge Strategy

November 2020

Enriching people's lives
by making
**INFORMATION,
KNOWLEDGE AND
ENTERTAINMENT**
instantly accessible to all

Limelight – The Optimal Edge

Where the
Delivery Network
Meets
Last Mile Networks

- Low latency
- Bandwidth intensity
- Scalability
- User Proximity
- Proximity to other edge services
- Data locality

Limelight Network

1,000+ ISPs

Users

Local connectivity to cloud service providers

Limelight Content Delivery

Edge Compute

EdgeFunctions – Launched Q3

Your functions at the Edge

EdgeFunctions enables developers to create and run their own functions at the edge of the Limelight network

Benefits

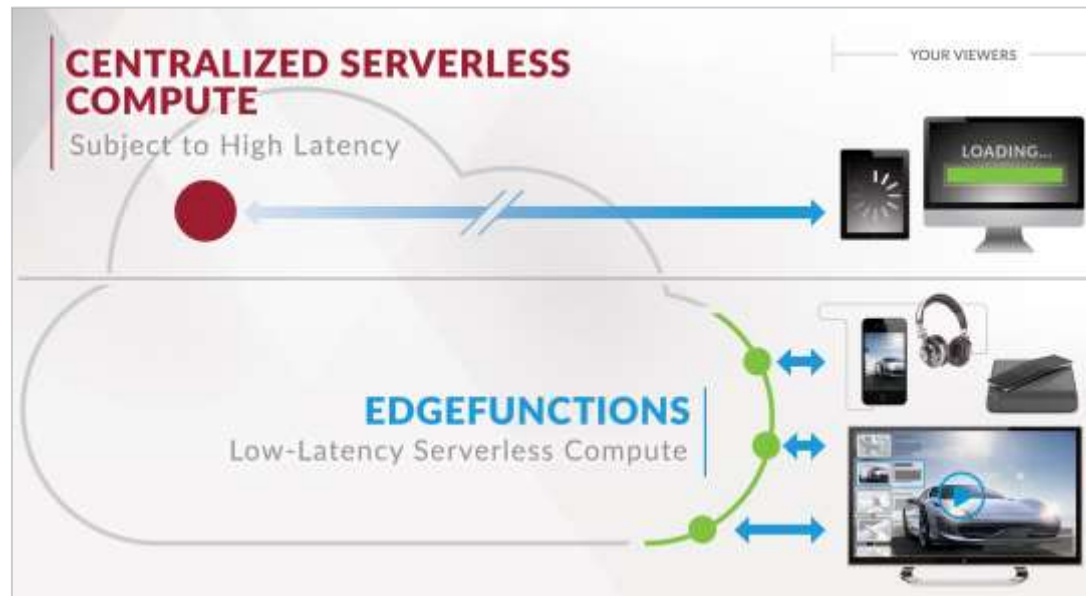

- Executes on-demand at closest site
- Scales automatically
- Improves application performance

Features

- Serverless compute
- Integrations through API & Terraform Provider
- Supports Node.js, Python, Go

Use Cases

- Watermarking
- Image resizing
- Personalization
- Dynamic content
- Data processing

Realtime Streaming – Service Updates in Q4

Sub-second latency at scale

Realtime streaming is the industry's first high-scale service for distributing live events and interactivity with less than 1 second of latency

Benefits

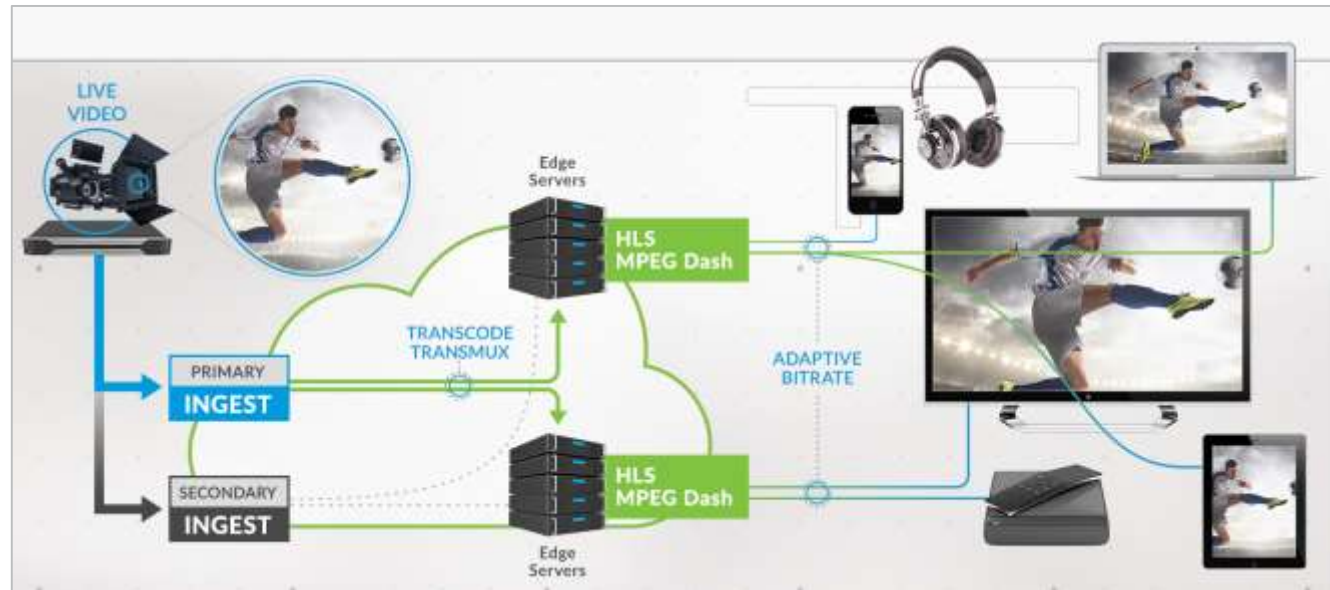

- Sub-second latency
- WebRTC delivery
- Scaled for 100Ks of simultaneous viewers

Features

- Adaptive Bitrates
- Shared Data Object
- SD/HD/UHD
- WebRTC ingest

Use Cases

- Live event interaction
- Wagering
- Live auction
- Gaming, eSports

Live Push Ingest – Launched Q2

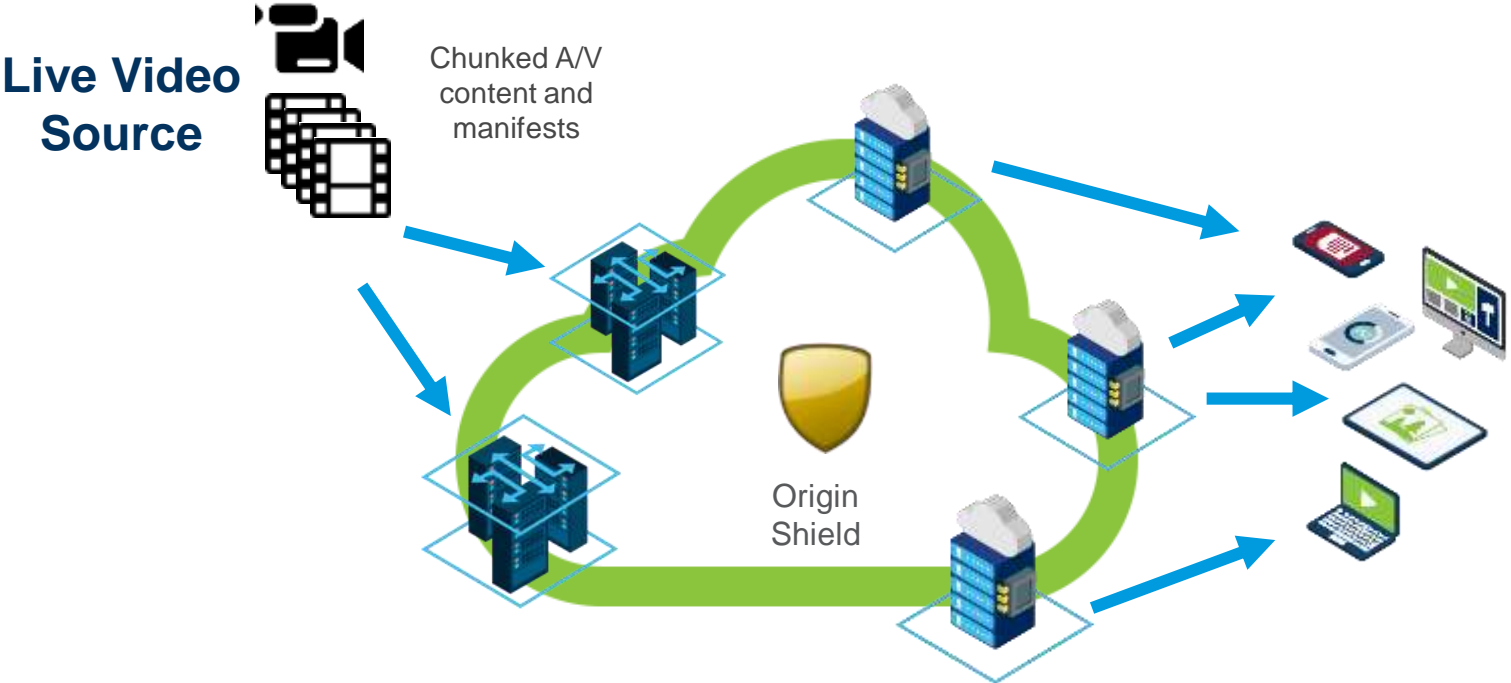

Putting Control into your hands

Live Push Ingest offers a high availability solution for ensuring high quality live stream distribution to CDN caching locations

- ### Benefits
- Programmatic Ingest
 - HLS, MPEG-DASH, and CMAF support
 - SD & HD up to 72Mbps per stream

- ### Features
- Scrubbing and delayed playback
 - Variable chunk size
 - Integrated ingest and delivery security

- ### Use Cases
- Live events
 - Live sports
 - Linear payout

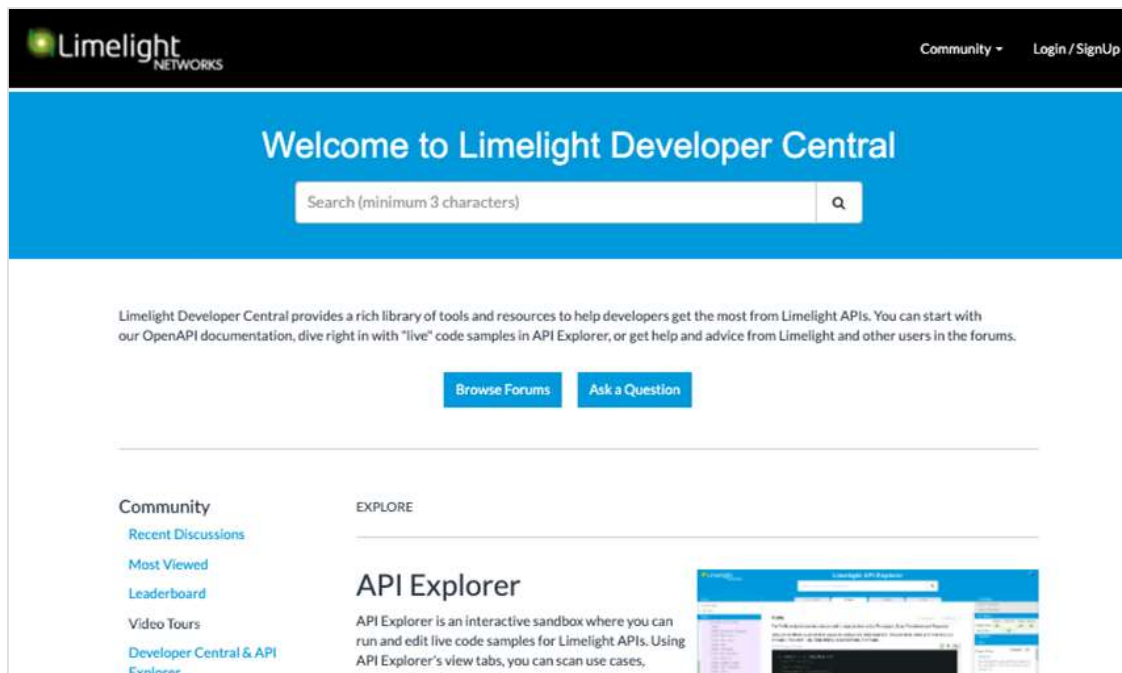

Developer Enablement – Launched Q2

Developer Enablement

Manage, monitor and enhance
your streaming video and
content delivery

developers.limelight.com

- **Online Community**
A forum to engage with fellow developers;
Experts to answer your questions
- **OpenAPI Documentation**
Industry best-practices, publicly available
- **Sample code**
Jumpstart your integration
- **Software Development Kits**
Code for common tasks; popular
programming languages
- **API Explorer**
Interactive API sandbox, use
cases, browse examples,
tutorial and fiddle views
